

First Jet Skis Licensed by ADOMS

FIRST JET SKIS LICENCED BY ADOMS

The first group of jet skis have now received their Safety Certificate and Licence from ADOMS, under the (Small Craft Control) Act 2015.

The jet skis are certified for five years, subject to a satisfactory annual inspection, when an annual licence decal is issued for affixing to the jet ski, next to the assigned licence number (see photograph detail above).

Only licenced jet skis should be rented and members of the public and visiting tourists are being advised to first check that jet skis are displaying a valid ADOMS licence decal. This will ensure that the required pre hire checks and full safety brief is completed.

Furthermore a high incidence of accidents with PWCs involve collisions and when manoeuvring at speed (including freestyling and wave/wake jumping) a safe distance should be kept from other PWCs, vessels underway or at anchor, or persons in the water.

Safe operational practice for jet skis

- at least 15 metres (50 feet) from another craft underway
- not within 50 metres (160 feet) of an anchored or moored vessel, a person in the water, or a jetty or wharf
- freestyling or wave/wake jumping is not allowed within 30 metres (100 feet) of another PWC or not within 50 metres (160 feet) of another vessel, or person in the water
- jet skis should not exceed 5 knots when they are closer than 75 metres (250 feet) from the shore

Please be aware that if Jet Ski is reported not to comply with this safe standard then the licence will be withdrawn.

Any questions on the small craft safety regulations should be directed to ADOMS Technical Department at:
